

Please reject the NAB's petition 04-160. The airwaves are for the benefit of the people, not the minority owners of stations. Protect our First Amendment right's to provide and or listen to any programming over the airwaves that does not violate the security of the United States, or jeopardize the common values of decency upon which our nation was founded. XM programming can only benefit the community, and may, in times of local catastrophic events (hurricane for instance), be the only link to the outside world if local stations are disabled. Dr. Muza
